HIGH-QUALITY ALUMINIUM

To ensure both durability and efficiency, the RR-595 features 1.3 mm thick non-anodized marine-grade aluminium reflector plates.

COMPACT DESIGN

With a length of only 45 cm, the RR-595 manages to deliver incredible RCS improvements.

RADAR CROSS-SECTION

Thanks to its proven reflector design, the RR-595 is capable of increasing your RCS at sea by up to 24 m².

LIGHTWEIGHT

The use of UV-resistant PP (polypropylene) ensures a robust, yet lightweight reflector cover design.
